SUMMARY

Full Stack Developer with a degree in Systems Analysis and Development (SENAI Roberto Mange, 2024) and a background that blends technology, teaching, and global corporate environments. I build complete applications from back-end to front-end: REST APIs in Node.js/Express and Python/FastAPI, front-end in React/TypeScript, relational databases (MySQL/PostgreSQL), and production deployments (Vercel, Supabase). My real-world projects include Nobello (e-commerce with Next.js + Stripe + Supabase in production), Finance.AI (financial dashboard with REST integration), and gupy-hunter (Python scraper in production). I currently work as a Technical Programming Instructor at a SEDUC-SP state school. Previously, I interned at Robert Bosch Ltda. (Campinas), gaining experience with SAP, international compliance, and daily technical communication with global teams in C1 English.

TECHNICAL SKILLS

Languages	Python · TypeScript · JavaScript · SQL · C# (basic) · Java (basic)
Back-End	Node.js · Express · FastAPI · REST APIs · microservices · webhooks
Front-End	React · Next.js · Tailwind CSS · HTML/CSS · TypeScript
Databases	PostgreSQL · MySQL · Supabase · advanced SQL · relational modeling
Cloud & Infra	Vercel Pro · Supabase (managed Postgres) · Docker (basic) · GitHub Actions
Tools	Git · GitHub · SAP ERP · OSGT (Thomson Reuters) · Advanced Excel · Stripe API · Claude API
Languages	Portuguese (native) · English C1 — EF SET 2025 (62/100) · French (elementary) · Italian (elementary)

PRODUCTION PROJECTS

Nobello | nobello.com.br | Next.js · TypeScript · Supabase (PostgreSQL) · Stripe · Vercel Pro

- Live e-commerce platform: full checkout with Stripe, shipping via Melhor Envio, registered .com.br domain.
- Custom CRM module: 6-table Postgres schema (customers, orders, pipeline, suppliers, retention alerts, dashboard).
- Billing infrastructure and third-party API integrations — real system with active users and transactions.

gupy-hunter | Python · Requests · BeautifulSoup · automation

- Web scraper built from scratch to automatically collect and filter job listings from the Gupy platform.
- Full pipeline: HTTP request → HTML parsing → filtering → structured export (ETL pattern).
- Best practices applied: rate limit control, error handling, robots.txt compliance.

Finance.AI | React · TypeScript · Claude API · brapi.dev

- Financial dashboard with real-time market quotes, portfolio simulator, and AI chat contextualized with live market data.
- Implemented caching with rate limiting to optimize API calls and control per-request cost.

MCP Servers — Trello + Windows | github.com/MunhozIago244 | TypeScript · Node.js · Protocol Buffers

- Two MCP servers built from scratch: 17 tools for Trello integration and 10 tools for desktop automation.
- Service-oriented architecture: each tool is an independent module with a defined contract, input validation, and documentation.

PROFESSIONAL EXPERIENCE

Full Stack Developer & Technical Programming Instructor — *Feb 2025 – Present*, Campinas, SP, Brazil
EE Tenista Maria Esther Bueno — SEDUC-SP

- Teach Back-End (Python/Node.js), Mobile, Networks, Programming Logic, and Digital Technologies for the technical Systems Development program.
- Code reviews for 20+ projects per semester, translating business requirements into technical specifications, and teaching development best practices.
- Internal tools built: Chrome extension for Moodle (automated grade entry), student raffle app, and Google Drive API scripts.

FabLab Didactic Laboratory Technician — *Feb 2025 – Aug 2025*, Indaiatuba, SP, Brazil
SESI São Paulo

- Managed the FabLab at SESI Indaiatuba: developed educational digital solutions and led interdisciplinary maker projects.
- Technical documentation of processes, requirements elicitation, and quality control with formal acceptance criteria.

Courses Coordinator / IT Instructor — *Nov 2024 – Feb 2025*, Valinhos, SP, Brazil
Microcamp Valinhos

- Coordinated technical IT courses and delivered computer skills instruction (2 months as instructor, 1 month as coordinator).

Intern — Foreign Trade & Compliance — *Jul 2023 – Nov 2024*, Campinas, SP, Brazil
Robert Bosch Ltda.

- Validated **500+ monthly import/export records** in SAP ERP, ensuring compliance with customs regulations and internal audit standards.
- Analyzed and documented compliance requirements in English with international teams (Germany, USA).
- Managed non-conformities in OSGT (Thomson Reuters): opening, tracking, and closing records.
- Prepared technical reports for local and global leadership. C1 English in daily communication with global teams.

Logistics Assistant
Mar 2023 – Jul 2023

Atvos / Raízen
Campinas, SP, Brazil

- Controlled material flow and supported operations at a large-scale industrial plant.

EDUCATION

B.Tech. in Systems Analysis and Development *Jan 2023 – Dec 2024*
SENAI Roberto Mange — Campinas, SP, Brazil

Technical Degree in Mechatronics *Jan 2021 – Dec 2022*
SENAI Roberto Mange — Campinas, SP, Brazil

High School — Computer Programming Track *Jan 2020 – Dec 2022*
SESI — Campinas, SP, Brazil

CERTIFICATIONS

- EF SET Certificate 62/100 — C1 Effective Proficiency (English) — 2025
- Cybersecurity Awareness — Best Practices in Cybersecurity
- Introduction to Risk Management
- Introduction to Futures Thinking in Public Management
